

COMPASS[®]

QUICK-START CHECKLIST

Feel free to check each step off as you work your way down the list.

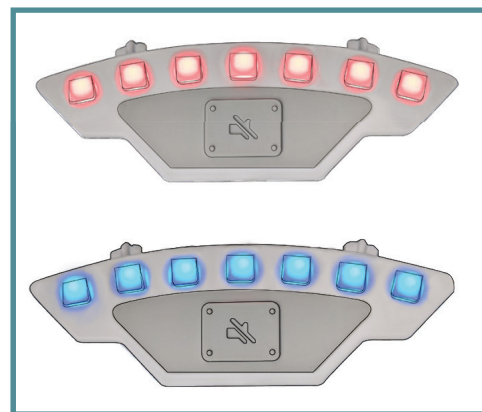

Charge: Plug charger into the Compass USB port to charge. One **Red** LED indicates charging. One **Green** LED indicates your Compass is fully charged. Press button during charging to display battery level.

figure 1

Power On: Quickly press the button on Compass. **Orange** LED sequence will show. **Green** LED will blink every 5 seconds to indicate that Compass is active.

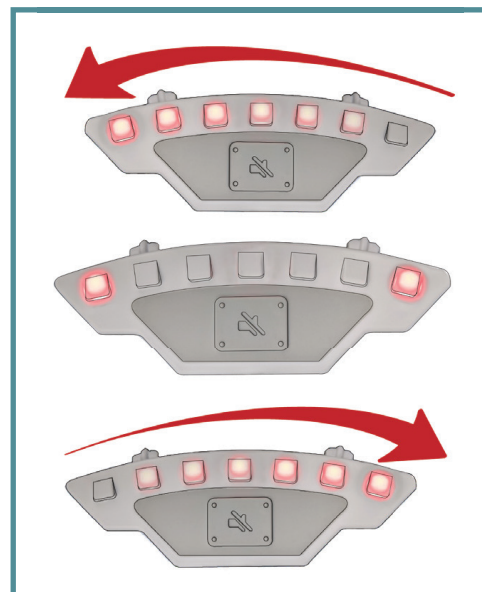

figure 2

Attach: Once your device has been turned on, simply attach it to the front underside brim of your hard hat. When the hard hat is worn, the device should be easily seen in your upper peripherals (Reference Figure 1).

Visual and Audible Alerts: When approaching an energized conductor, Compass will display **Red** lights for Voltage and **Blue** lights for Current (Reference Figure 2). When the electric field is strong enough (Voltage only), the directional animation will start swiping **Red** lights towards the direction of the threat. Two lights, one on each side, indicates the threat is directly in front of the user (Reference Figure 3 for Directional).

figure 3

Mute Alerts: Quickly press the center button on Compass to toggle between the mute and un-mute of your audible notifications. Audible notifications will re-engage after 5 minutes.
